

FIREFIGHTERS SERVICE REPORT FOR ELEVATORS

The National Elevator Safety Code, ANSI A17.1, Rule 1206.7, Maintenance of Firefighters' Service, states:

“All elevators provided with firefighters' service shall be subjected monthly to a phase I recall and a minimum of one-floor operation on phase II to assure the system is maintained in proper operating order. A written record of findings on the operation shall be made and kept on the premises of said operation.”

This form has been developed to assist service persons in complying with this code requirement. If the elevator does not function properly, contact your service office immediately. If phase I and II are functioning properly, indicate the date and name of the person conducting the test.
